Summary:

Sarthak Karandikar, based in Pune, Maharashtra, India, is a teenager with a profound passion for science and technology. He discovered his true calling after trying various pursuits, and it led him to the world of science and technology. He has aligned his work life with this passion.

After encountering life's challenges and a near-fatal breakdown, Sarthak embarked on a journey of self-discovery. He found that the transactional world couldn't provide the peace he sought, and everything in this world was uncertain and transient. This introspection led him to the concept of enlightenment.

Over the course of several years, Sarthak questioned and reasoned about enlightenment, ultimately concluding that even in the spiritual realm, there is no certainty, only perceptions of reality. The one constant was the sense of existence itself, beyond labels or definitions. He realized that at the deepest level, individuals just are. They are not defined by this or that; they simply exist. Despite the change in his understanding, life in the realm of the mind and body continued with its challenges. Sarthak recognized that he faced these challenges like any other human being. The world remained the same - it is, was, and will be. He now perceives the world with a structure-free and concept-less mindset, embracing the uncertainty that surrounds everything.

Sarthak doesn't aim to provide hope or despair, to judge things as good or bad, or to show light or darkness. He simply strives to see things as they are, making authenticity a core theme in all his work.

He is highly enthusiastic about technology, with a particular interest in AI, IoT, and the Metaverse. He believes that technology, when used appropriately, has the potential to answer fundamental questions about human existence. While he was once a part of three startups, he left them due to the existential crisis he previously mentioned. Sarthak was also a content creator, but he shifted his focus to applied science and technology.

Sarthak frequently uses LinkedIn as a platform for self-expression. He can be reached via WhatsApp for professional purposes or through email for discussions and inquiries.

Experience:

Co-Founder at Existence (Sep 2023 - Present)

Sarthak is currently working on the evolution of existence.

Content Manager at Ujwala's Kitchen (May 2023 - Sep 2023)

In this role, Sarthak managed social media channels, conducted video editing, graphic design, and video shooting.
